PROFILE

Software Engineer with 4+ years of experience in React.js, TypeScript, and Node.js, with a strong focus on usability, system performance, and scalable architectures. Proficient in designing intuitive interfaces and reliable backend systems. Passionate about intelligent systems, product engineering, and real-world user impact.

PROFESSIONAL EXPERIENCE

Software Engineer

01/2025 – Present

StorySpark AI

London,

United Kingdom

- Led full-stack development of AI-powered storytelling products across frontend, backend, and cloud infrastructure.
- Designed and built end-to-end user flows, including editors, checkout systems, and content-generation pipelines.
- Integrated LLM and AI image-generation workflows into user-facing features.
- Architected scalable backend services using Node.js, PostgreSQL, and TypeORM.
- Implemented Stripe-based payments, subscriptions, and gifting systems.
- Deployed and managed AWS infrastructure with CI/CD pipelines.
- Key products
 - StorySpark: Personalized AI storybook platform with interactive editor and checkout flow.
 - Recipe Stories: AI-powered cookbook creation product with drag-and-drop editor, PDF export, and print ordering.

Web Developer

08/2020 – 10/2022

Freelance

Yangon, Myanmar

- Developed responsive web applications using React, TypeScript, PHP, Laravel, and REST APIs.
- Built reusable UI components and design systems for multiple clients.

Selected Projects

- Pharmacy POS System
 - Built a web-based point-of-sale system for retail pharmacies.
 - Implemented sales tracking, receipt generation, and inventory updates.
- Used Laravel and MySQL.
- Inventory Management System
 - Replaced manual spreadsheet-based workflows with a web application.
 - Implemented stock tracking, reporting dashboards, and role-based access.
- Used React.js and Node.js.

Software Engineer Intern

10/2019 – 12/2019

Japan Advanced Institute of Science and Technology

Ishikawa, Nomi, Japan

- Optimized a Java-based Sudoku Solver using a SAT Solver, reducing memory usage and runtime by over 10%.
- Gained experience in Formal Languages and Regular Expressions, applying theoretical knowledge in Java-based implementations.
- Communicate with supervisor, solving Computer Science related algorithmic challenges and enhancing analytical and research skills in a structured, data-driven environment.

EDUCATION

MSc Computer Science - Artificial Intelligence

Present

University of Galway 📍

Galway, Ireland

Courses: Advanced Topics in Natural Language Processing, Deep Learning, Information Retrieval, Machine Learning, Agents, Multi-Agent Systems and Reinforcement Learning, Optimisation, Knowledge Graphs, Web and Network Science

BSc(Hons) in Information Technology

09/2023 – 05/2024

Middlesex University

London,

- Graduated with first class honours.

United Kingdom

- Courses: Web-based Mobile App Development, User Experience (UX) Designs, Strategic Information Systems (Enterprise Project) Management, Undergraduate Individual Project.

Level 5 Diploma in Computing

NCC Education

06/2022 – 07/2023

Yangon, Myanmar

- Graduated with distinctions.
- Courses: Dynamic Websites, Information Systems, Network Security and Cryptography, Database Design and Development, Computing Project

CONFERENCE PAPER

Understanding Non-native English Speakers' Perceptions of Voice User Interfaces with and without a Visual Display: A Usability Study

01/12/2019

International Conference on Advanced Information Technologies (ICAIT, 2020)

Co-author. Paper presented at International Conference on Advanced Information Technologies (ICAIT, 2020), Myanmar. Yangon, Myanmar

UNIVERSITY PROJECTS

Gamified Job seeking Application

Middlesex University Final Project

- Developed and designed a full-stack web application aimed at enhancing job-seeking through gamification.
- Utilized React, TypeScript, Node, Express and MongoDB for a scalable and efficient experience.
- Integrated Octalysis Analysis for improved user engagement and motivation, showcasing my ability to merge design and functionality effectively.
- Followed SDLC methodologies from requirements gathering to integration testing and deployment, with an emphasis on creating engaging user experiences.

User Experience Design for Smart Delivery Application

Middlesex University UX/UI Project

- Conducted comprehensive user research, including interviews and surveys, to gather insights and identify user needs, informing the design process.
- Applied UX theories and frameworks, such as Design Thinking and Human-Centered Design, to guide the development of a user-centered interface, utilizing tools like Figma for wireframing and prototyping.
- Collaborate in a cross-functional team using Miro, analyzing data from user feedback and usability tests to iterate on designs, resulting in a more intuitive and effective user experience.

SKILLS

Programming

Java, Python, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3, Tailwind CSS

Databases & ORM

PostgreSQL, MySQL, MongoDB
Prisma, TypeORM Database
schema design, migrations,
relational modeling

Testing

Jest, Playwright

Soft Skills

Time Management, Teamwork,
Attention to Detail, Problem
Solving, Documentation,
Leadership, Project Management,
Software Engineering,
Communication Skills

Frontend Technologies

React.js, Next.js (App Router),
Server Components, React Hooks,
Responsive Design, Redux, React
Query, Zustand

Version Control & Tools

Git, GitHub, GitHub Actions,
Docker (beginner), Stripe CLI

GenAI & Multimedia Tools

AI image generation workflows
Audio generation & processing
pipelines

Backend & Server Development

Node.js, Express.js, RESTful APIs,
Authentication (JWT, OAuth),
API rate limiting, middleware
patterns

Cloud & DevOps

Firebase, AWS, Azure, CI/CD
basics, environment management

UI/UX Design

Figma, Adobe XD, Component
Libraries, Responsive Design
